

## Screen Shot with Classes Selected

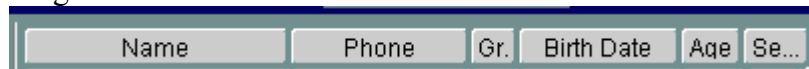

The screenshot shows the 'Teacher Assistant' software interface. The 'Classes' tab is selected, and a list of classes is displayed. The 'Selected Class List' column header is highlighted. The interface includes a 'My Students' section with buttons for 'Basic Demographi...', 'Academic Progress', and 'Student Absences'. There is also an 'Alert' button. The 'My Classes' section includes buttons for 'List', 'Ph...', 'Summary', 'Spreadsheet', 'Single', 'Reports', 'mark Entrv', and 'Setup Options'. The 'eSIS' logo is visible in the bottom left corner.

**Note:** If the list is not populated when you first login, you need to click the ‘Today’s button off and back on’ to cause a refresh to occur.

Today’s Classes – only classes for the using date will be listed.

Sorting – Click on the Column heading to re-sort the list of names in the class.

- The **AC (Attendance Complete)**  checkbox of the Class area may be used to indicate that attendance has been taken for the class. This allows the teacher to check this box on the Start screen instead of going into the Attendance screen. (This is usually used when all students are present).
- The **Alert button** provides selected information on the highlighted student.
